### COMMERCIAL PAPER SCARCE. An Indication of Prosperity in the

Mercantile Community. NEW YORK, May 2-One of the best indications of the general prosperity of the country, certainly so far as the mer-cantile community is concerned, is the carcity of commercial paper on the mar-

it is a matter of common knowledge in financial circles that there is now a smaller amount of negotiable paper on the market than for a long time here-Not only is this true, but the money market is growing easier all the time. There is only one inference to be drawn from the fact that this condition erevails, and that is that the merchants

are so well supplied with funds that they do not need to borrow.

Money brokers and men who deal in ommercial paper says that the amount of commercial paper on the market is now fully one-fourth less than last year. That is considered a very conservative estimate. Not a few assert that there is one-third less business transacted in commercial paper than last year.

# THE UNION PACIFIC CONTROL. Recent Heavy Parchases Not Made for W. K. Vanderbilt.

NEW YORK, May 1- Whatever the outcome of the contest for control of the Union Pacific Railroad, which has been waged on so tremeddous a scale in the stock market, it appeared foday that the result might not be definitely known until the annual meeting. That is more than five months off, in October, and it seems preity certain that, however actual control of the property may rest at present, there will be no change in manageme until that date. Those now in control of the railroad are not disposed to admithat they have lost control. They place report, again heard in Wall Street today as positively as ever, that the North-western is to guarantee Union Pacific

Mr. Harriman and those acting with him believe that they are still masters of the situation, and they deny that they have made any of the recent heavy purchases in the markes accredited to them in a desire to fortify their position. That there has been the strongest possible of fort to gain control of the Union Pacific by outside interests they do not deny Much of the recent buying, which has carried the price of Union Pacific to such extraordinary figures, they consider to be of shares had been largely withdrawn Pacific still remains with them, and speak

while they assert that control of Union Pracific still remains with them, and speak confidently in this regard, they admit that it may be shown at or before the annual meeting that the enormous buying in the stock has been more concentrated than they believe it to have been.

Discussing the present situation, one influential interest said today: "We do not attach very much importance to the buying of Union Pacific shares this week. We believe it to have been largely ephemeral. This opinion we have on surfaces indications as well as internal evidence, which we have as to the sources of the buying. That there has been a deliberate effort to buy control we are well aware. That, however, is last week's history. Then there was very serious haying of Union Pacific securities with the undoubted offort to take control. Naturally we do not care to say much on the subject, or in regard to the degree of success which the largors met. We feel secure, however. The report that the buying was for W. K. Vanderbilt, or for the Northwestern, we know positively is incorrect."
